Profile

I am an **open source software** enthusiast learning C, Rust, and Python; interested in FOSS development, as well as Linux application development. I also share a growing interest in Web Design and Machine Learning. Being fascinated by the implications of free software, as well as wanting to strive for its betterment, I run a FOSS club at my college. I watch Anime, listen to music, and read books in my free time.

Education

Bachelor of Engineering in Comp Sci. and Engineering,
